

Exercise #2(Batch2)     Dated:11/8/2017     Marks: 10

- a) Write a lex file to replace all integer numbers in a text file by its hexadecimal notation.
- b) count the number of numbers appearing in the input. Count the number of integers (without a decimal) separately from the number of floating point numbers (with a decimal, and at least one digit on either side of the decimal).
- c) Find for date in the input file with the format (dd/mm/yyyy) and convert it into the format (mm/dd/yyyy).
